

SEVIS Release 6.20 Final System Changes

April 23, 2015

Production Release Date: April 24, 2015

The following summarizes the final system changes to SEVIS with Release 6.20.

F/M School Officials

Employment Information Screen

A Primary Designated School Official/Designated School Official (P/DSO) will have the ability to view a student's entire employment record for a particular Student and Exchange Visitor Information System (SEVIS) ID in a centralized location, on the Employment Information screen. The link for the Employment Information screen can be located on the Student Information screen.

The default view on the new employment screen will display Optional Practical Training (OPT), Curricular Practical Training (CPT), and off-campus employment for all periods of employment associated with a particular SEVIS ID, with the different periods of employment sorted in reverse chronological order by employment end date. The P/DSO will also have the ability to filter the employment table based on the type of employment (All Employment, OPT, CPT, and OFF-CAMPUS). The Employment Information screen will also indicate whether the employment is active, full-time or part-time employment, DSO Recommended Employment Start/End Date, Actual Start Date/End Date, school (the school of the school official who recommended or authorized the employment), education level, request status, and receipt number.

Example of the Student Employment Information Screen

SEVIS ID: N0004685318
